## MANTEL DIMENSION WORKSHEET

**Provide us with a few measurements and we will create a set of mantel measurements and an estimate based on your style choice.**

**Important Notes:** Local building codes dictate the minimum clearance that combustible (wood mantels) may be from the fireplace opening. Generally they are a minimum of 6" on either side and as much as 12" on top. Our mantels are designed to slightly overlap the facing material on the sides and top by a minimum of 1/2".
